# About Us

We are a digital transformation consultancy and software development company that provides cutting edge engineering solutions, helping companies and enterprise clients untangle complex issues that always emerge during their digital evolution journey.

Since 2017 we have been a visionary and a reliable software consulting partner for world-class brands.

# Originality is the best form of rebellion

At Freelyformd we help businesses build an intelligently designed digital future. Tell us about your idea, and we'll offer the most fitting technological solution.

Each year, we help enterprises accelerate adoption of new technologies, untangle complex issues that always emerge during digital evolution, and orchestrate ongoing innovation. Whether it is a consumer-oriented app or a transformative enterprise-class solution, the company leads the process from ideation and concept to delivery, and provides ongoing support through its framework.

**We are innovators and passionate problem solvers both in software engineering and digital design.**

We help you to find the solution that suits your needs best. We begin every project with requirements gathering and analysis. Don't worry if your requirements change, we use agile methodology to keep costs down.

# Our Services

From custom software development with the latest tech to automated quality assurance, you get all types of software development services to help you build, sustain, and modernize enterprise software as well as our extensive expertise in building IT solutions.

## Enterprise Software Development

Need a solid software foundation for your business? Leverage our expertise in enterprise software development, API integration, modernising legacy systems, and consolidating app portfolios.

## Mobile App Development

Create an impactful mobile app that fits your brand and industry within a shorter time frame.

## Progressive Web Apps

A PWA can be installed and used offline on a users device. This allows you to engage your customers while bypassing the app/play store. This maximizes engagement, simplifies marketing channels, and reduces costs

## USSD

USSD-run applications are easily accessible by people with both smartphones and non-smartphones, and are therefore able reach a wider audience.

### **Emdedded Systems**

We can help you design, implement and source parts for your custom device

### **Desktop Applications**

Using modern technologies, we can deliver cross platform desktop apps. Release your desktop app on Windows, MacOS and Linux at no extra cost

### **Dev Ops**

We can help your software team transition towards a devops culture. This means faster and predictable deployment. Reduced time to market and happier customers

### **Web Design, Domain & Hosting**

Whether you require a simple brochure website, a personal portfolio, or an extensive ecommerce website with integrated content management systems, we can help you.

### **Dedicated Development Team**

Hire a loyal software development team with niche skills and deep expertise.

### **IT Consulting**

Trust our top minds to eliminate workflow pain points, implement new tech, and consolidate app portfolios.

# Why Us

We work for clients, not quarterly results. This allows us to be responsive, flexible, and client focused. The goals we set for our company always take into consideration the best long-term interest of our clients rather than the short-term interest of financial pressures.

## Innovate

We push industry boundaries to deliver quality tailored software.

## Agile

We continuously collaborate with our clients to build the right solutions for their customers

## Transparent

We strive to build trust and long lasting relationships with our clients.

# Our Process

1

## KICK-OFF
